- + Weight: 125.4 lbs
- + Price: \$2,329.00 + tax and shipping\*
- + Mobile app: Yes (\$4.99/mo. or \$55.00/yr.)

The **Defender Advantage** represents a significant jump in package protection capability and technology. This top-of-the-line product combines an amazing mix of sensors and features all tied to mobile technology, giving the home and business owner unrivaled safety, flexibility and convenience.

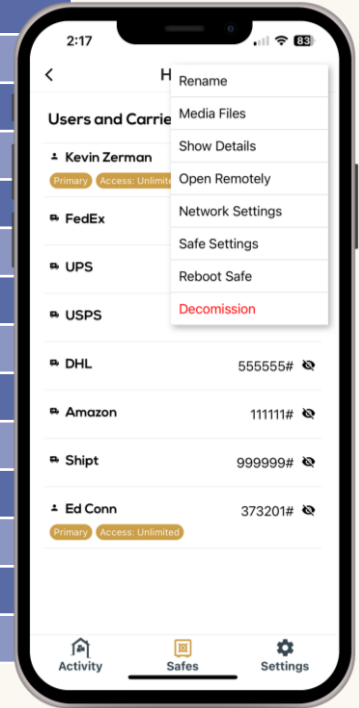

The **Defender Advantage** vaulted unit incorporates a quality backlit, metal keypad and audible commands with an electronic locking system that communicates with the Parcel Safe mobile app during and after a delivery person has accessed the unit. The **Defender Advantage** door dimensions allow approximately 85%\*\* of the delivered packages to fit, while the depth of the vault may limit overall package dimensions. There are two vault depths available, 18" and 24". This unit can be installed on a pedestal or in almost any correctly sized opening with adequate depth, giving you package delivery safety and convenience at your home or business.

The **Defender Advantage** communicates directly with the Parcel Safe mobile app telling you, the home or business owner, when someone accesses the unit, and closes the door. Once the door is closed, a picture is taken of the contents and sent to the mobile app's Activity feed.

The mobile app also allows you to control who can access the unit, and how often, and exactly when they can access it. You can assign PIN codes (access codes) on the fly to anyone you choose and can grant or delete a variety of user rights to family, friends and business associates, all from the mobile app. As a matter of fact, you can even open the unit remotely, anytime and from anywhere in the world you have a cell or Wi-Fi connection, with just two clicks.

FEATURES	Defender Advantage with Vault
Mobile app notifications and functionality	X
Notification of door open, door closed, and door left open	X
Inside LED and camera for pictures of deliveries	X
